

ISO STANDARDS PRESENT ON SPORTS FIELDS

ISO standards may not be visible, but they are reflected in every game: greater safety, higher quality, reduced environmental impact, responsible use of resources, and more sustainable sporting events.

ISO 50001

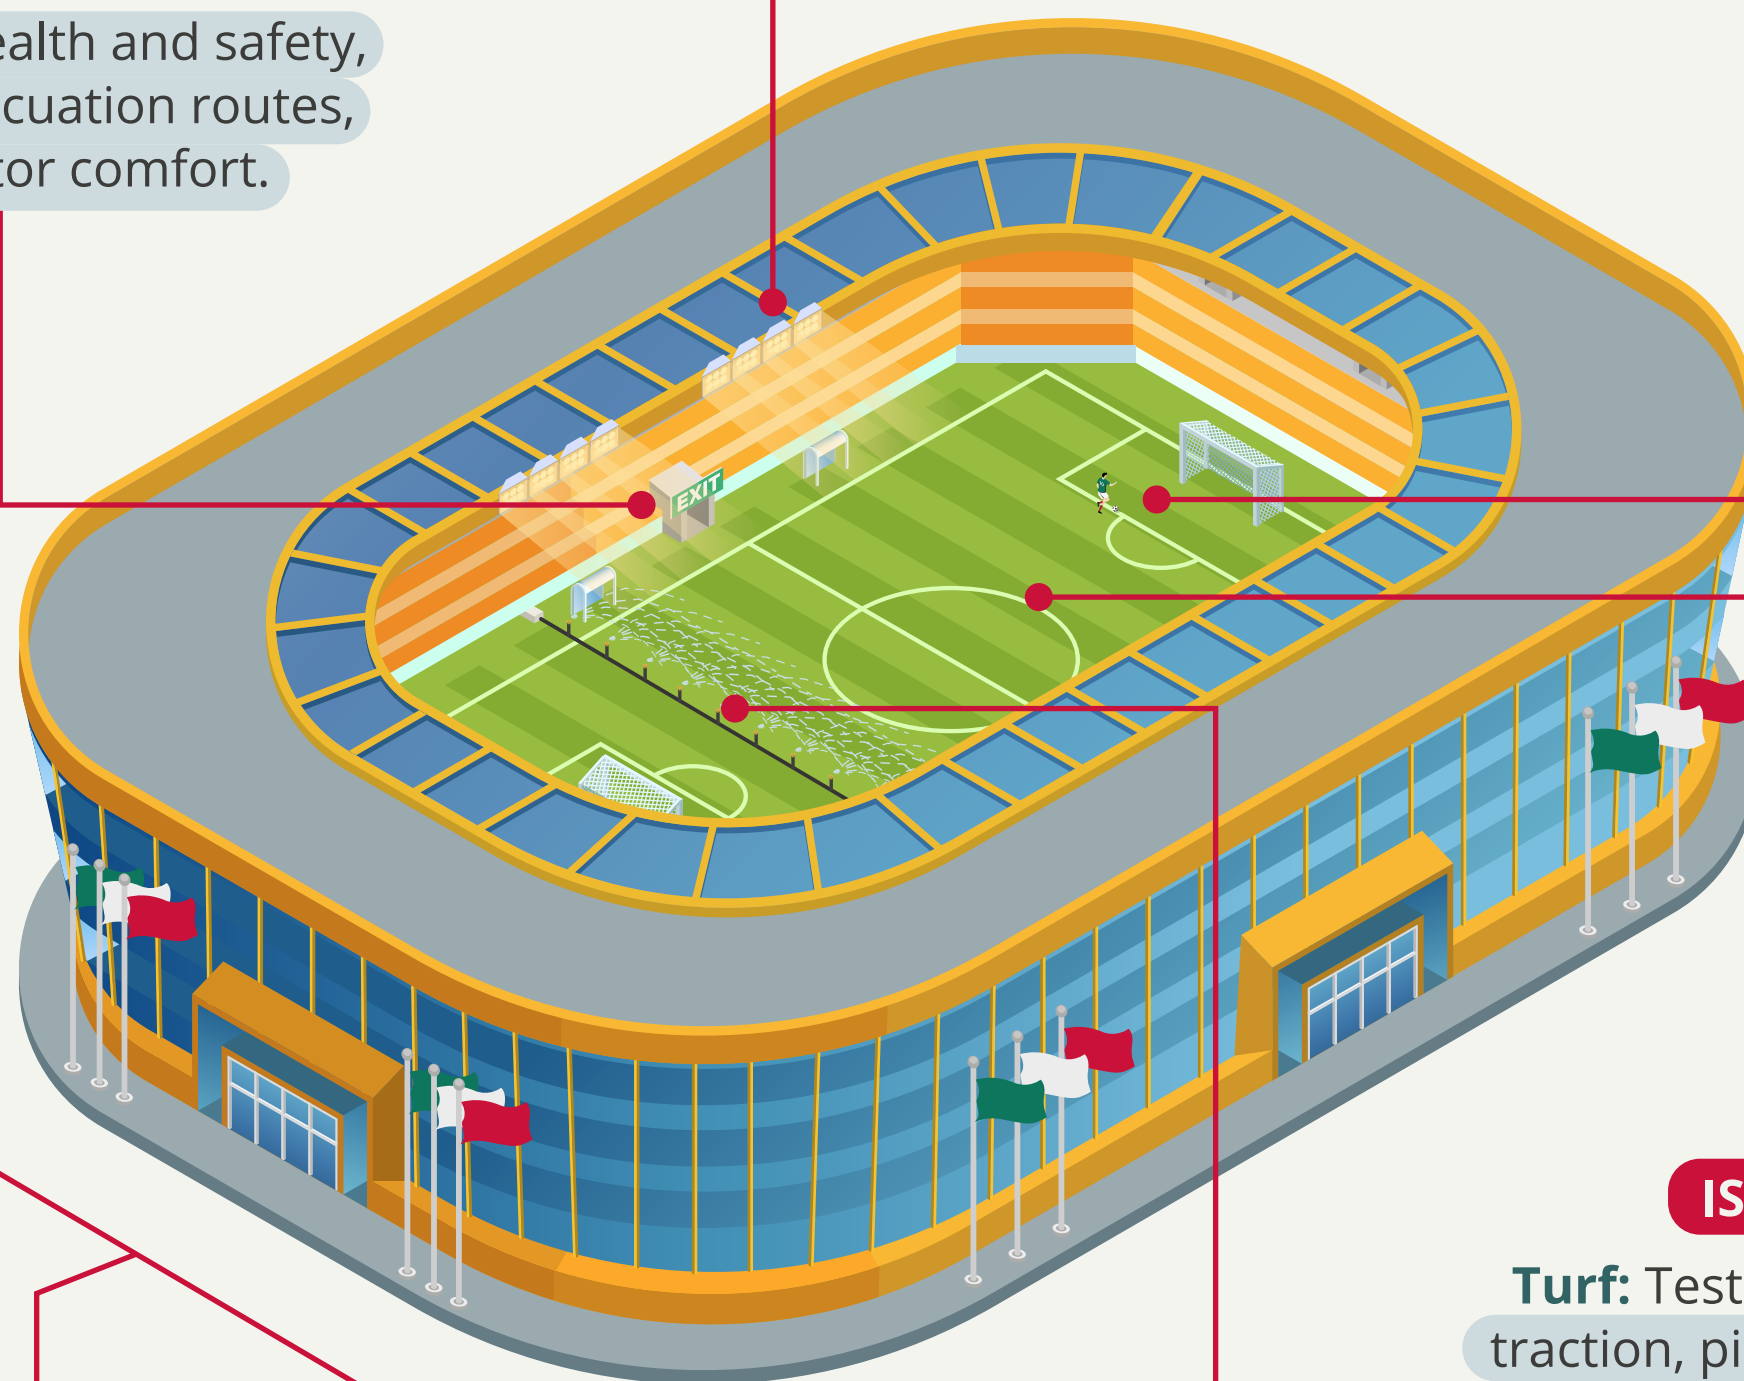

Lighting: Improves energy efficiency and reduces environmental impact.

ISO 20121

Match: Reduces environmental impact while promoting social inclusion, accessibility and a positive community legacy.

ISO 45001

Stadium: Ensures occupational health and safety, emergency evacuation routes, and spectator comfort.

ISO 17025

Turf: Testing for strength, traction, pile height, density and moisture content.

ISO 9001

Construction: Ensures quality in construction, maintenance and operations to meet the expectations of players and spectators.

ISO 14001

Irrigation and drainage system: Promotes efficient water use, proper system maintenance and reduced resource consumption.
